1. Fuping Dairy Goat Whole Industry Chain Demonstration Zone Construction Project

1. Project name:

Fuping Dairy Goat Industry Chain Demonstration Zone Construction Project

2. Project unit:

Fuping County People's Government

3. Project content:

Mainly to build a series of production lines and complete production lines for liquid goat milk, goat milk specialty snacks and goat milk toiletries.

R&D and production of industrial chain products.

4. Total investment and cooperation methods:

The total investment of the project is 2 billion yuan, and the project can take the form of sole proprietorship or government-enterprise cooperation.

5. Market forecast and investment return analysis:

The integration of government, enterprise, agriculture, production and sales can indirectly drive tens of thousands of jobs.

2. Shanyang County Low Molecular Heparin Sodium Industry Chain Project

1. Project name:

Shanyang County Low Molecular Heparin Sodium Industry Chain Project

2. Project unit:

Shanyang Hengrui Meat Products Co., Ltd.

3. Project content:

In the Shanyang County Industrial Concentration Zone, it is planned to build an annual output of 100 million enoxaparin sodium, heparin sodium injection and that

Treparin calcium injection, 20,000 boxes (2400AxaIU*24 capsules) sodium heparin lozenges, 100 million sticks of sodium heparin cream,

100 million heparin sodium blood collection tubes and other products. At present, the preparation of the project analysis has been completed.

4. Total investment and cooperation methods:

The total investment of the project is 700 million yuan, and it is planned to carry out all four subprojects including enoxaparin sodium and heparin sodium injection.

Investment promotion, joint venture or others are all acceptable.

5. Market forecast and investment return analysis:

Heparin sodium is made from the intestinal mucosa scraped from the porcine small intestine through the ion exchange resin method.

This kind of anticoagulant drug is a safe and effective antithrombotic drug that has been clinically used for many years and has a broad market.

Product demand is increasing. The company decided to seize market opportunities to build China's first-class and largest heparin in Northwest China

Sodium R&D, extraction and production base. After the project is completed, the annual sales income will be 2.575 billion yuan, and the profit and tax will be 7.56 million yuan.

3. Natural drinking water project with an annual output of 1 million tons in Xunyang County

1. Project name:

Natural drinking water project with an annual output of 1 million tons in Xunyang County

2. Project unit:

Xunyang County Investment Service Center

Xunyang County Economic and Trade Bureau

3. Project content:

Construct a natural drinking water project with an annual output of 1 million tons in Xunyang County.

Xunyang County belongs to the water source protection area of the water intake project of the Middle Route of the South-to-North Water Diversion Project. There are dense rivers in the county and many underground springs.

There are 196 large and small rivers. There are abundant mountain and underground spring water resources, and the water is rich in selenium, strontium and other human bodies

Essential trace elements, high-quality natural drinking water resources are all over the county. At present, Baohekou of Maping Town in the county is rich in selenium

Natural spring water, natural spring water from Guoshangou in Huafang Village, Jinzhai Town, natural spring water from Shuidonggou in Shuanghe Town, plum blossom in Tongmu Town

Many natural drinking water resources such as natural spring water and Wenjiahe natural spring water in Miaowan Village of Hongjun Town have not yet been developed.

It is estimated that the average annual water volume can meet the production demand of natural drinking water with an annual output of more than 1 million tons.

The development potential is huge.

4. Total investment and cooperation methods:

The total investment of the project is 500 million yuan, and the investment investment is planned to be 500 million yuan, either joint venture or sole proprietorship.

5. Market forecast and investment return analysis:

After the project is completed, it is estimated that the annual sales income will be 2 billion yuan, the profit and tax will be 600 million yuan, and employment will be solved.

More than 1,000 people.

4. Weinan Economic Development Zone Self-heating Food Production Base Project

1. Project name:

Self-heating food production base project in Weinan Economic Development Zone

2. Project unit:

Weinan Economic Development Zone Food Industrial Park (Western section of Jinhua Street).

3. Project content:

The project is planned to cover an area of 50 acres, combined with the development advantages of the food industry in our district, build a self-heating food production base,

Mainly include self-heating rice, hot pot, pasta and other series of food.

4. Total investment and cooperation methods:

The total investment of the project is 300 million yuan, attracting investment.

5. Market forecast and investment return analysis:

After the completion of the project, it will greatly boost the development speed of the food industry in our district, and will be a great help for the food industry in Weinan.

Development adds new momentum.

5. Ningqiang County High-quality Water Resources Development and Utilization Project

1. Project name:

Ningqiang County Quality Water Resources Development and Utilization Project

2. Project unit:

Ninggiang County Economic Cooperation Bureau

3. Project content:

Ningqiang covers a wide area of forest, has superior natural conditions, has the reputation of a natural oxygen bar, and has abundant water resources without pollution

Dye, known for its "natural, pure, safe, hygienic and healthy", its water resources are extremely rich and rich

The trace elements potassium, sodium, calcium, strontium, zinc, bromine, iodine, selenium, lithium, etc., have high development value. Proposed

The main facilities include mineral water filling workshop, precipitation and disinfection workshop, packaging and quality inspection workshop, low-temperature cold storage,

Mineral water production line and supporting facilities.

4. Total investment and cooperation methods:

The total investment of the project is 300 million yuan, sole proprietorship, joint venture or cooperation.

5. Market forecast and investment return analysis:

After the project is completed, it can realize an annual output value of 120 million yuan.

6. Western Plush Toy Cultural and Creative Industrial Park Project in Pingli County

1. Project name:

Pingli County Western Plush Toy Cultural and Creative Industrial Park Project

2. Project unit:

Pingli County Investment Service Center

3. Project content:

The project plans to occupy an area of 30 mu in Pinli County, with a construction area of 30,000 square meters, and set up a creative creation center,

Training centers, production centers, experience centers, etc., to build artistic workshops and work areas, including plush toy creation

The production process display, creation, production and training functions of the product, at the same time, the introduction and new construction of plush toys

Creative design, production and other related enterprises.

4. Total investment and cooperation methods:

The total investment of the project is 300 million yuan, and the source of funds is investment promotion funds, either sole proprietorship, joint venture or cooperation.

5. Market forecast and investment return analysis:

After the project is completed, the annual operating income will be 300 million yuan, the profit will be 100 million yuan, and the investment payback period will be 3 years.

7. Mizhi County Millet Industry Convergence Development Construction Project

1. Project name:

Mizhi County Millet Industry Integration Development Construction Project

2. Project unit:

Mizhi County Industrial Park Management Committee

3. Project content:

The project is planned to occupy an area of 800 mu in Mizhi County Industrial Park. The investment will be divided into two phases. The main construction content of the first phase

Infrastructure projects, public service projects and 3 millet primary processing enterprises were completed and put into operation, and 8 were completed in the second phase

Millet processing enterprises.

In recent years, the Mizhi County Party Committee and the Government have attached great importance to the development of the millet industry

The fist industry comes to grasp.

4. Total investment and cooperation methods:

The total investment of the project is 200 million yuan, wholly-owned or joint venture.

5. Market forecast and investment return analysis:

After the project is completed, it is estimated that the annual income will be 100 million yuan, the profit and tax will be 20 million, and it will provide 500 jobs.

The completion of the project will promote the integrated development of rural primary, secondary and tertiary industries, improve agricultural quality and efficiency, and increase farmers' employment and income.

At this time, the Xiaomi Industrial Demonstration Park will drive the surrounding small miscellaneous grain industries to gather closer, and the industrial agglomeration effect will be prominent and the sales

Sales capacity continues to improve.

8. Natural mineral spring series products and supporting facilities construction project in Zhashui County

1. Project name:

Construction Project of Natural Mineral Spring Series Products and Supporting Facilities in Zhashui County

2. Project unit:

Management Committee of Xiaoling Industrial Zone, Zhashui County

3. Project content:

Build a 200,000-ton/year mineral spring series product production line and supporting facilities, using physical filtration and aseptic filling

Treatment process to develop high-end water resources in Hongyansi Town, Xiaoling Town, Yingpan Town, etc. in Zhashui use.

4. Total investment and cooperation methods:

The total investment of the project is 200 million yuan. Sole proprietorship, cooperation or other options are acceptable.

5. Market forecast and investment return analysis:

Zhashui County is rich in groundwater resources, with excellent water quality, rich in strontium, metasilicate, lithium, selenium, zinc, molybdenum, etc.

A mineral element that can maintain the osmotic pressure of human cells, maintain the body's acid-base balance, and maintain normal physiological functions.

Speed up biochemical reactions, activate soften organs, promote metabolism, relieve fatigue and other functions,

It also contains reactive oxygen species (free radicals) that fight diseases, which can effectively prevent high blood pressure and arteriosclerosis.

Broad prospects. After the project is completed, the annual sales income will be 50 million yuan, and the profit and tax will be 18 million yuan.

9. Shiquan County 2 million sets of mid-to-high-end silk home textile project

1. Project name:

Shiquan County 2 million sets of medium and high-end silk home textile project

2. Project unit:

Shiguan County Economic and Trade Bureau

3. Project content:

Build a production line and production vehicle with an annual output of 2 million sets of mid-to-highend home textile products in Chihe Industrial Park, Shiquan County

Related supporting facilities such as rooms, office buildings, and comprehensive areas. Currently in the preliminary planning stage.

4. Total investment and cooperation methods:

The total investment of the project is 120 million yuan, and the methods are sole proprietorship, joint venture, cooperative development, etc.

5. Market forecast and investment return analysis:

After the project is completed, the normal annual sales income will reach 160 million yuan and the net profit will be 25 million yuan. Good

Good economic benefits.

10. Qingjian Northern Shaanxi Wild Vegetable Cultivation Base and Wild Vegetable Freshkeeping and Processing Project

1. Project name:

Qingjian Northern Shaanxi Wild Vegetable Cultivation Base and Wild Vegetable Fresh-keeping Processing Project

2. Project unit:

Qingjian County Investment Promotion Service Bureau

3. Project content:

The project plans to build a 1,000-mu edible wild vegetable production base, the main varieties are mainly grown locally grown bitter vegetables.

Also plant alfalfa, shepherd's purse, wolfberry sprouts, and cumin green buds (Artemisia annua sprouts). At the same time, a new edible vegetable with an annual output of 30,000 tons

One fresh-keeping processing plant and one cold storage with a capacity of 800 tons.

4. Total investment and cooperation methods:

The total investment of the project is 60 million yuan, either sole proprietorship or cooperation.

5. Market forecast and investment return analysis:

After the project is completed and put into production, the annual output of 1000 mu of wild vegetables will be 36.67 million kilograms.

The annual design and processing capacity of the factory is 30,000 tons, which can achieve an annual output value of 120 million yuan. After deducting various expenses, the annual profit is nearly

15 million yuan, with a payback period of 4 years.

11. Northwest Small Food Production Base Construction Project in Liquan County

1. Project name:

Construction Project of Northwest Small Food Production Base in Liquan County

2. Project unit:

Liquan County Investment Promotion Bureau

3. Project content:

Liquan Food Industrial Park is located in the north and east of Liquan County, with a planned area of 10 square kilometers. Park

It has obvious location advantages and convenient transportation. It is 2.5 kilometers away from the Liquan exit of Fuyin Expressway, 2 kilometers from Guanzhong Ring Road, and 312 kilometers.

National highway 1.5 kilometers. Infrastructure facilities such as water, electricity, roads, natural gas, and sewage treatment are complete. Currently has

Taiwan Unity, Beijing Huiyuan Food and Beverage, Shandong Andre Juice, Jiaduobao Canned Beverage, Ziqi Food, etc.

Many well-known enterprises have settled in the park. According to market demand, our county plans to build Northwest Primary School in the park area.

Food production base with a planned area of 500 acres, mainly for the development of various well-known small food production enterprises across the country

platform.

4. Total investment and cooperation methods:

The total investment of the project is more than 50 million yuan in a single project, solely invested.

5. Market forecast and investment return analysis:

Liquan County has superior geographical advantages, convenient transportation and outstanding radiation functions. Liquan has excellent food industry

Many talents and other advantages. Investing in Liquan will surely get rich returns.

12. Dali County Destroyed Fruits and Vegetables Processing City Production City Integration Project

1. Project name:

Dali County Destroyed Fruit and Vegetable Processing City Production City Integration Project

2. Project unit:

Dali County Economic Development Zone Management Committee

3. Project content:

The planned land area of the project is 5 square kilometers, relying on the advantages of Dali agricultural resources to build a national-level agricultural product processing

New city and national industry-city integration innovation demonstration zone. Main planning and construction: agricultural products mainly for processing dehydrated fruits and vegetables

Processing cluster area, technological innovation leading area focusing on gathering agricultural product processing technology resources, modern logistics and

The logistics and e-commerce zone led by the Internet of Things technology, and the industry-urban finance with the theme of the integration of the tertiary industry and life services

He Demonstration Zone.

4. Total investment and cooperation methods:

The total investment of the project is 5.5 billion yuan, and it is aimed at new industrial cities such as China Fortune Fund, China Merchants Shekou, and COFCO.

The overall operator conducts overall investment promotion.

5. Market forecast and investment return analysis:

The new industrial city operation model is an effective way to coordinate various production factors and promote the development of industrial clusters.

The project will innovate the investment promotion model of Dali Economic Development Zone, based on the advantages of Dali's high-quality agricultural products, and intensive development.

The development of a modern food processing industry cluster dominated by dehydrated fruits and vegetables will promote the coordinated development of regional related industries.

Continuously optimize the industrial ecological environment with enterprises as the core, and promote the development of Dali Economic Development Zone into a model of "industry-city integration"

Fan.
